| | |
|---|---|
| **Languages** | JavaScript, jQuery, HTML, CSS, C++, SQL, Tailwind CSS |
| **Technologies** | React.Js, Git, Node.Js, Express.Js, MongoDB, Postman |
| **Tools** | Redux, Figma, VS Code |

## Projects

**Portfolio (Link)**  *React JS | HTML | CSS*
- Clean and responsive design optimized for desktop and mobile devices, ensuring an engaging user experience across all platforms.
- Seamless navigation and intuitive user interface, allowing visitors to explore my portfolio, view project details, and contact me easily.

**E-Commerce (Link)**  *React JS | Tailwind CSS*
- React.js with the useContext hook for efficient state management. Integrated Fake Store API for real-time product updates. Experienced in responsive design and cross-browser compatibility.

**TinDog (Link)**  *HTML | CSS | Bootstrap*
- Utilized Bootstrap framework to develop a responsive landing page for TinDog, a dating app for pets, to provide a visually appealing & user-friendly introduction to the platform. Employed HTML & CSS for structuring & styling.

**Task-Tik (Link)**  *React JS | HTML | CSS*
- Developed a dynamic To-Do app for an intuitive & responsive task management experience. CSS, HTML & React.js to build interactive & modular components for task creation, display, & removal. Implemented state management using React useState hook for managing tasks & input fields.

**Drum-Kit (Link)**  *JavaScript | HTML | CSS*
- Designed & developed an interactive drum kit application. Implemented JavaScript event handling to detect keyboard & mouse interactions, triggering the corresponding drum sounds.

## UI Design

**Website Design for MyGradeHub Startup Company (Link)**
- Designed a website for MyGradeHub Startup Company, showcasing their web pages including landing page, registration page, login page, form fill page, forgot password page, reset password successful page, email verification page, otp verification page, application submission & unique application token generation page using figma.

## Certificates

**Web Development | Full Stack (Link)**
- Hand-on experience in HTML, CSS, JavaScript, Bootstrap, React JS, jQuery, Unix, Node.js, Express JS, Git, PostgreSQL.

**React JS | Real World Projects (Link)**
- Hand-on experience in Task Manager App, Movie list App (using Public API), E-Commerce App.

**MERN Chat Application (Link)**
- Hand-on experience in socket.io, Chakra UI, MongoDB.
